UI / UX / Web / Marketing

In the past three years of, I have focused on providing design solutions for small-scale businesses, focusing on hierarchical information transmission and improving offline conversion rates.

In past project experiences, I have provided services to customers and achieved business goals through innovative design and technical solutions.

- 1 Social media assets
 - 2 Local business (Marketing)
 - 3 Pathwyze (Website)
 - 4 Joyplay (Mobile)

2026

Social media assets

Multi-media Campaign Content

Maintained a consistent visual identity across campaign assets, including posters and email campaigns.

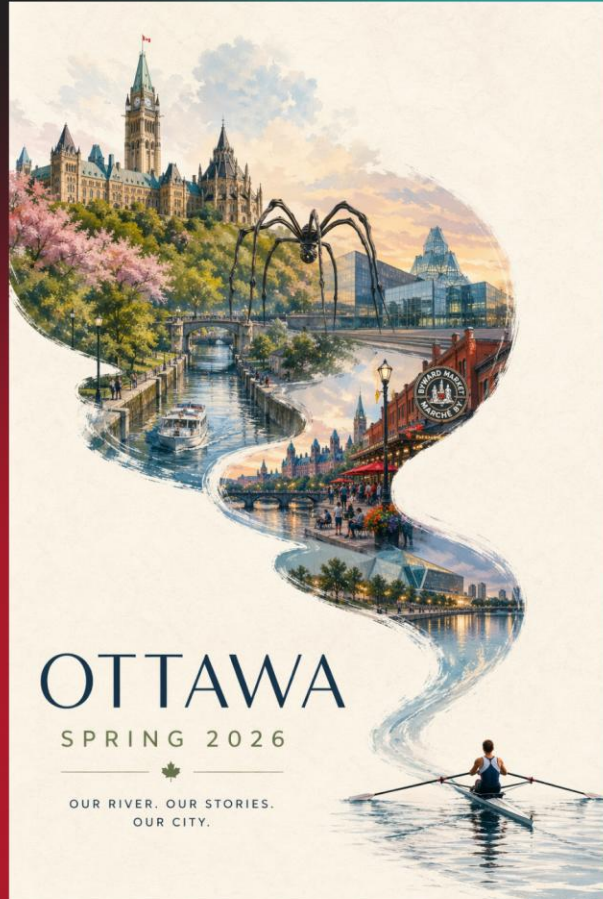

Followed email design best practices and built reusable templates using HTML.

Print products sign (Card & Brochuer & Poster)

AI-assisted Design Workflows

Utilized AI-assisted design workflows for poster creation, demonstrating expertise in generating and controlling style-based prompts, as well as refining outputs to meet design requirements.

Greatly enhanced productivity and creative exploration.

Local business

Business Discovery & Competitive Analysis

PROJECT GOALS

- ✓ Modernize outdated industrial website
- ✓ Improve service discoverability
- ✓ Increase local SEO visibility
- ✓ Build customer trust

CHALLENGES

Legacy Website

Visual Design System

I analyzed the existing website to identify valuable brand elements worth preserving, then developed a consistent visual system that modernized the user experience while maintaining brand recognition.

The Peace Tree
Learning Centre

Lawn sign

Designed a print campaign to support student enrollment for a local learning center. Focused on clear information hierarchy, approachable visual language, and strong call-to-action to effectively engage both students and parents.

Programs

To help the learning center present its educational offerings, I designed the Program section to showcase courses and age-appropriate learning paths.

This page provides parents with an overview of the center's curriculum structure, teaching methods, and schedules.

I focused on creating a clean and welcoming interface that reflects the center's educational values. Key design elements include color-coded course categories, age group filters, and icon-based visual aids to improve readability and engagement.

Programs

At The Peace Tree, we offer flexible, high-quality Montessori learning programs designed to enrich your child's education—perfect for homeschoolers or families seeking personalized learning. Our small group setting allows us to tailor teaching to each child's unique needs, and we're committed to bringing in additional programs that benefit the Ottawa community.

Contact Page

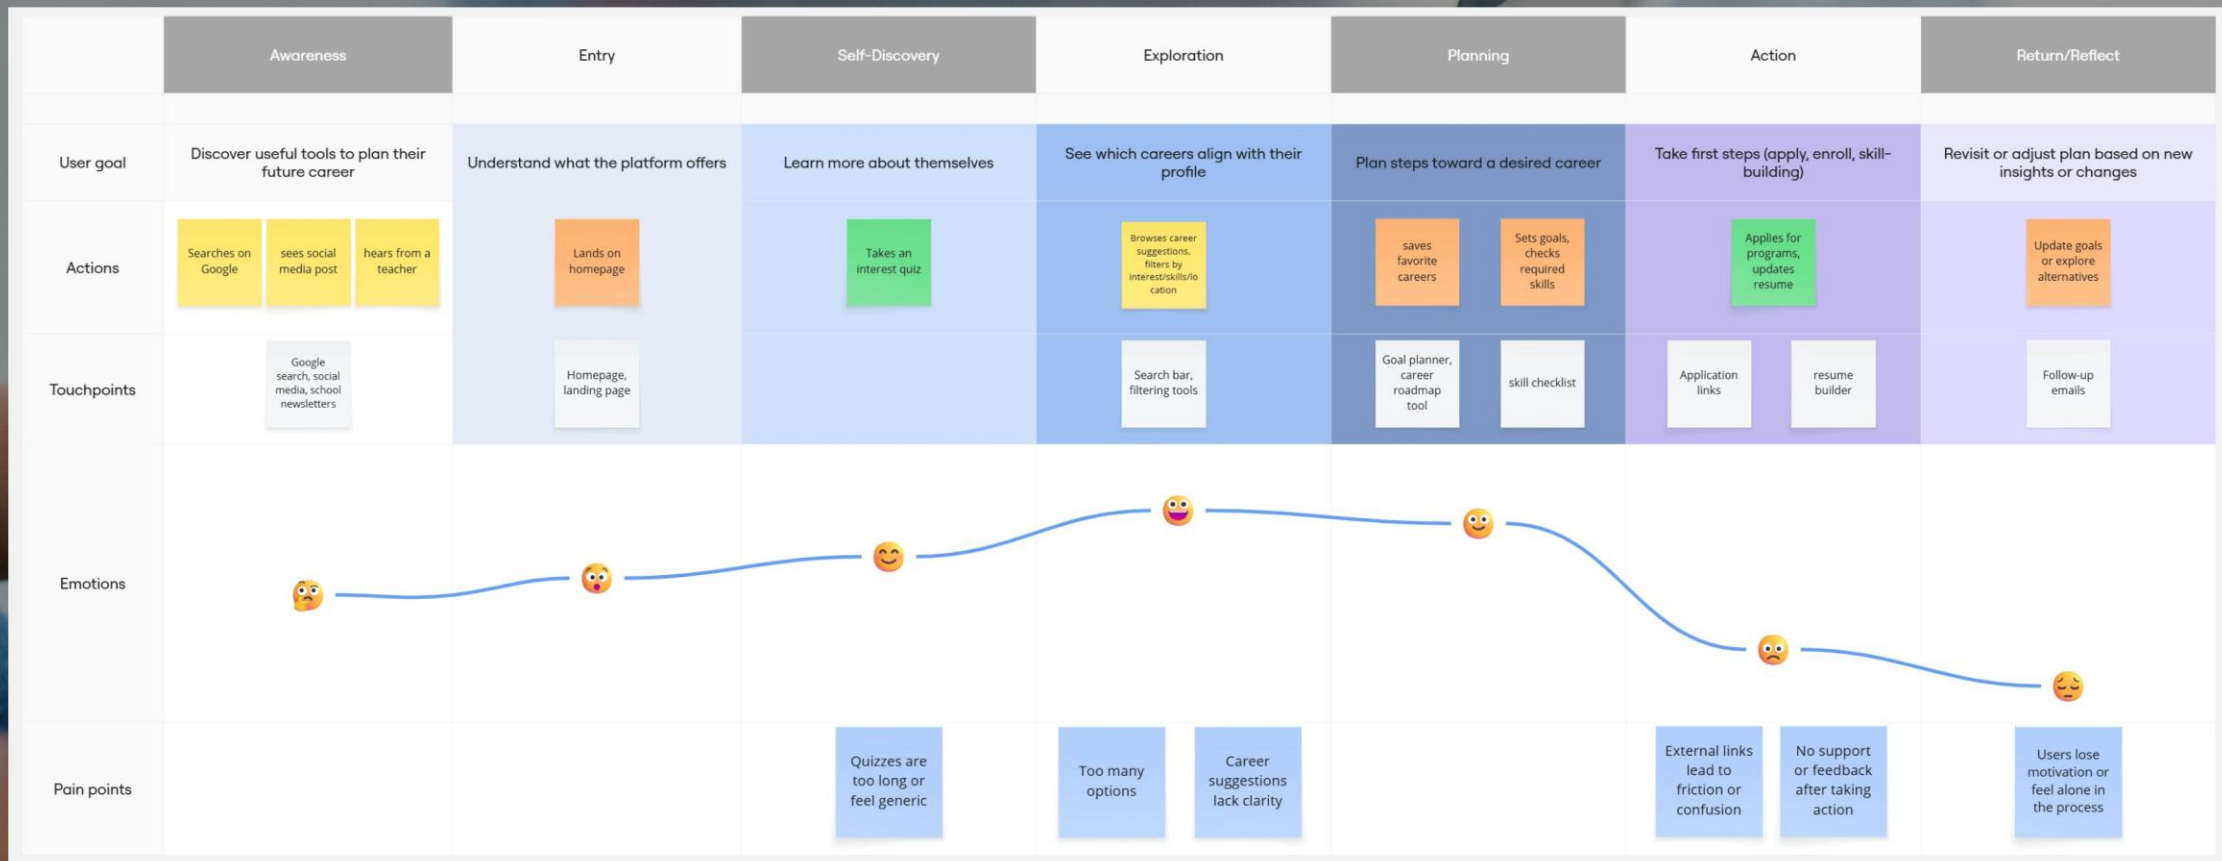

I designed the About Us page to convey her principles, teaching approach, and vision for students' growth.

The layout focuses on clear content hierarchy, warm visual elements, and intuitive navigation. I collaborated closely with the client to ensure her story and teaching mission were represented.

Key Features

Get tailored learning resources, career insights, and join a professional community to support your growth. We cannot wait to see you at here!

Usage Process

Usage Process

What users are saying about us

Designed by Han

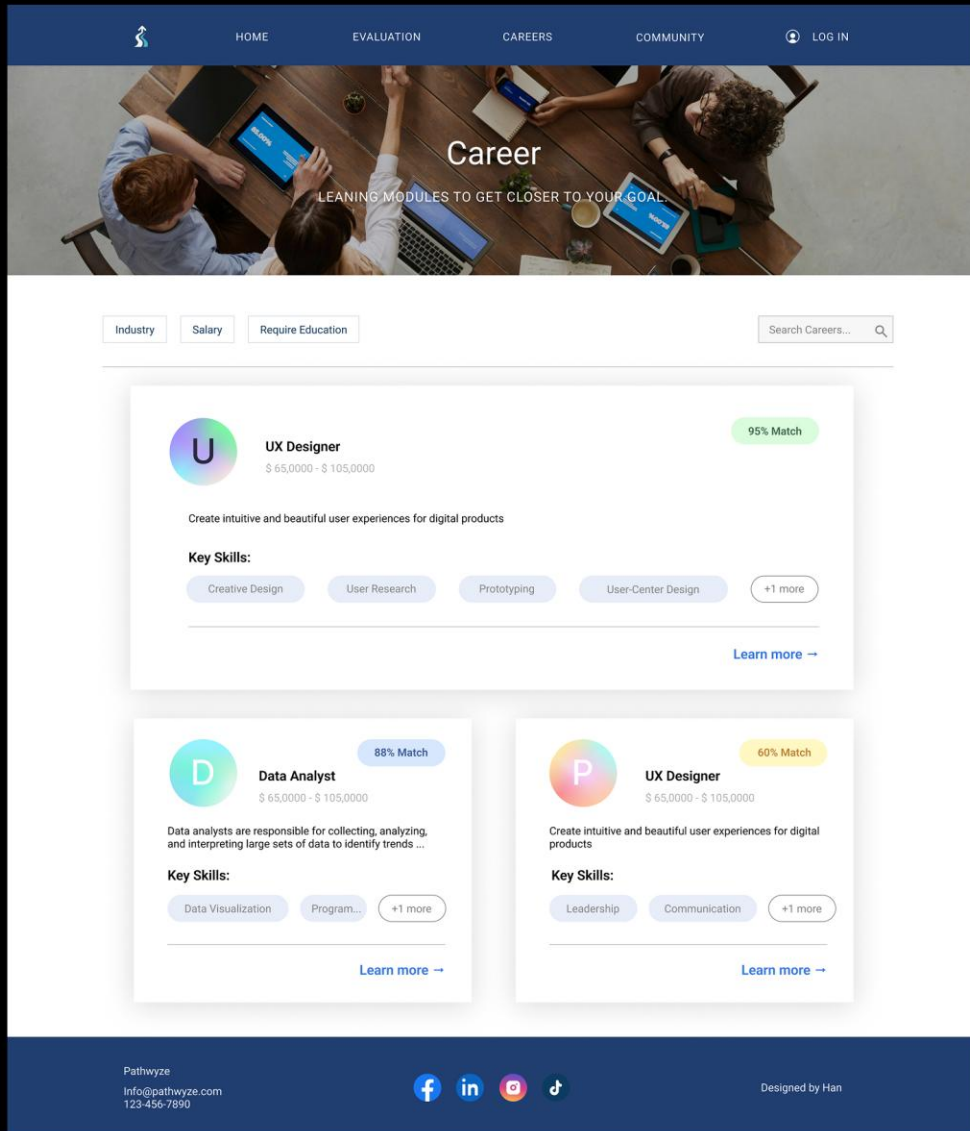

Home

The home page features a clean, blue-toned design that conveys professionalism and aligns with the target user's preferences.

The layout focuses on highlighting key product features and providing a straightforward overview of the usage process.

Clear visual hierarchy and concise messaging guide users' attention toward the Evaluation Page, which serves as the primary call-to-action.

The design ensures that visitors can quickly understand the value of the product and are encouraged to proceed seamlessly to the next step in their journey.

Career

Career page, which allows users to explore job roles through personalized recommendations and filtering tools.

Interest-Based Suggestions: Users receive job role suggestions based on selected interests or a short quiz.

Filter System: Users can narrow down options by industry, education level, salary range.

Career Cards: Each card provides a snapshot of the role, including key responsibilities, growth outlook, and required qualifications.

JoyPlay - APP

From initial research and feature planning to wireframing and high-fidelity prototyping, I ensured the product design aligned with user needs and business goals.

Wireframes

App Flow

The user flow diagram visually represents the step-by-step journey a user takes when interacting with both online and offline processes in the project.

Wireframing

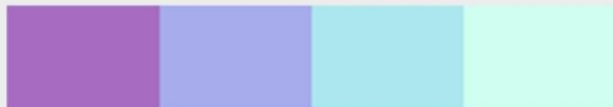

Wireframing involves creating low-fidelity UI sketches that outline the structure and layout of the interface without detailed design elements.

The background of the slide is a dark, out-of-focus image featuring bokeh light effects. There are several bright blue and cyan light spots, some of which appear to be reflections of light on water or glass. Interspersed among these are a few warmer, reddish-orange light spots. The overall effect is a soft, artistic, and somewhat ethereal glow against the black background.
